

XENON™

Body Styling Kits! • Sport Flares

2008 APPLICATION

***Quality begins
with great design...***

Xenon has been designing and manufacturing premium quality body kits, flares, and accessories for cars, trucks and SUVs for over 25 years. We know how to create style and fashion along with fit and finish. We're dedicated to providing the look that enhances your vehicle.

Every Xenon component is developed in our state of the art tooling shop by designers and stylists that use our time honored methods to ensure that each kit, flare, and accessory adds to the look and function of your vehicle. Only the highest quality material is used during mold making. This eliminates any chance of imperfect product and production variations. The first part is identical to the last.

Xenon uses only high quality urethane in the creation of our components because, unlike fiberglass and other materials, urethane has a greater load bearing capacity. Urethane will hold it's shape and will not break under stress. Urethane has excellent chemical resistance and will withstand repeated flexing without cracking. Urethane is rugged and durable and will last the lifetime of the vehicle.

Xenon's award winning design is complemented by a fit and finish that is second to none. Each component is styled to fit your vehicle with OEM precision. Easily prepped for paint, each component comes complete with installation instructions and hardware. Xenon's Limited Lifetime Warranty covers every urethane kit, flare, and component.

**Quality begins
with great
design...**
